Mechanical engineering for January-November 2024.

For the period January-November of this year, the volume of production of mechanical engineering products in value terms increased by 8.1%, totalling 3,991 billion tenge. The IFO in relation to the same period last year was 106.9%.

The following volume index indicators were achieved in terms of industry sectors:

IFO of production of electrical equipment (108.1%),

IFO of production of other transport vehicles (163.7%),

IFO of production of computers, electronic and optical equipment (176.7%),

IFO of production of machinery and equipment not included in other categories (115.4%),

IFO of production of motor vehicles, trailers and semi-trailers (91.7%).

Exports of machine-building products in January-October 2024 compared to the same period of 2023 in monetary terms decreased by 2.8% and totalled USD 3,572 million. US DOLLARS.

The main export countries for this period are Russia (46.4%), Ireland (16.4%), Kyrgyzstan (5.04%), Uzbekistan (5.0%), Turkey (4.6%).

Imports of engineering products for January-October 2024 compared to the same period of 2023 in monetary terms decreased by 8.8 per cent and amounted to USD 20,168 million. US DOLLARS. In the structure of imports, the main share is accounted for by aircraft (6.8%), passenger cars with engine volumes from 1501 to 3000 cm3 (4.7%), smartphones (4.1%), and bodies for passenger cars (3.8%).

The main countries supplying machine-building products to Kazakhstan are China (34.7%), Russia (12.5%), Germany (6.4%), USA (6.2%), Korea (5.9%).

The industry is characterised by high territorial concentration in the northern and central regions of the country (Kostanay region, Astana city, Karaganda, Akmola, Pavlodar and North-Kazakhstan regions), as well as Almaty city.
